

Open Source Lecture 5

1-a ____ is a point in space having its own 3D position in the coordinate system.

- a- Vertex
- b- Position
- c- Texture
- d- None

Answer : a.

2-Normal is a way to describe the direction the vertex is facing .

- a- True
- b- False

Answer : a.

3-A ____ is a collection of vertices , edges and faces that define the shape of a 3D object.

- a- Prototype
- b- Collector
- c- Mesh
- d- Star

Answer : c.

4- When you have 3 or more edges around a face its referred as N-gon.

- a- True
- b- False

Answer : b, explanation (" 5 or more ")

5- Normal is just a hidden victor , basically a direction without a specified origin.

- a- True
- b- False

Answer : a.

Open Source Lecture 5

6- _____ Normals can be used by the renderer to change light angle.

- a- Faces
- b- Vertex
- c- Interpolated
- d- None

Answer : c.

7- The default Winding order for Blender is ____.

- a- CW – Clockwise
- b- CCW- Counter Clockwise
- c- none
- d- both

answer : a.

8- FBX is one of the most used 3d formats.

- a- True
- b- False

Answer :a.

9- _____ modeling , you lay out each vertex and draw each polygon one by one until the entire model is complete.

- a- Primitive
- b- Non primitive
- c- From scratch
- d- None

Answer : c.

10- Box modeling is popular to character modeling , you just need to add detail to the whole shape.

- a- True
- b- False

Answer : a.

Open Source Lecture 5

11- ____ modeling is additive or subtractive method of changing the geometry of one object by introducing another object and running a Boolean function.

- a- Primitive
- b- From scratch
- c- Boolean
- d- Laser scanning

Answer : c.

12- Digital sculpting is actually a way to make shapes can be pushed or pulled like Clay.

- a- True
- b- False

Answer : a.

13-NURBS surfaces are manipulated by moving vertices , edges and faces.

- a- True
- b- False

Answer : b , explanation (“ they’re manipulated by special control points . “)

Note : “ Take a look at the lecture , you will have a better imagination “

14- ____ View , the configuration includes field of view , aspect ratio and optional near and far planes.

- a- Orthographic
- b- Perspective
- c- None
- d- Both

Answer : b.

15- Perspective projection is just like our eyes and cameras “ the way we look at things “ .

- a- True
- b- False

Answer : a .

Note (“ The Orthographic projection is quite an architectural drawing with no distance distortion “)

Open Source Lecture 5

16-The view of frustum is the volume that contains everything that is potentially visible on screen .

- a- True
- b- False

Answer : a.

17- Field of view , is an angle inside the camera can see Objects that are far away and are too small to see .

- a- True
- b- False

Answer : a.

18- ____ map , tells you the glossiness of the surface and determines how reflective the material is .

- a- Color
- b- Metalness
- c- Roughness
- d- Transparency

Answer : c.

19- Gloss and Roughness are Interchangeable , they are the inverses of each other .

- a- True
- b- False

Answer : a.

20- ____ map creates illusion of depth by faking details on the surface .

- a- Metalness
- b- Roughness
- c- Bump
- d- Normal

Answer : c.

Note (“ Normal map is a type of bump map which fakes the details by using angle information to tell which direction each point of the surface should be oriented towards “)

Open Source Lecture 5

21- ____ Maps uses Black and white values , black is the minimum height delta and white is the maximum.

- a- Bump
- b- Normal
- c- None
- d- Both

Answer : a , note (" Normal uses RGB values which means its more detailed ")

22- At PBR textures components the map which is the most important and gives information about the color of the object is __ map .

- a- Specular
- b- Normal
- c- Albedo
- d- Diffuse

Answer : c and d . note (" sry for the confusion ")

23- ____ is /are example/s of light sources .

- a- Directional light - > most used to simulate sunlight and moonlight
- b- Ambient light - > is light that is spread everywhere equally in a all directions
- c- Spotlights - > It's a 3D spotlight
- d- Point or Omni lights - >lights on a single point in all directions .
- e- All above

Answer : e.

24- Baking is a term used widely in 3D community , it means freezing and recording the result of a computer process , used in animation , simulations and texturing 3d models.

- a- True
- b- False

Answer : a , note (" guess who thought it was about Baking ? , bread , croissant : "D ")

25- Clay renders produces a clay render which is the default form for a non textured model.

- a- True
- b- False

Answer : a.

Open Source Lecture 5

26-_____ rendering , displays only edges of the polygon

- a- Clay
- b- Wireframe
- c- Cell shading
- d- None

Answer : b.

27-Photorealistic rendering is a modern technique that renders the images more realistic and clearer than ever.

- a- True
- b- False

Answer : a.

28-Skinning the character means to add bones “structure” .

- a- True
- b- False

Answer : b, explanation (“ Rigging the character “)

“ Thanks “
