Agile values

- *The four core agile values, from the Agile Manifesto, are:*
- Individuals and Interactions over processes and tools.
- Working software over comprehensive documentation.
- Customer collaboration over contract negotiation.
- Responding to change over Following a Plan.

Agile values Cont.

- These values *prioritize human elements* and flexibility *to deliver value and adapt to evolving needs*, rather than rigid adherence to predetermined processes or extensive upfront planning.

Agile Principles Cont.

- **1- Customer Satisfaction:** Our highest priority is to satisfy the customer through early and continuous delivery of valuable software.

Early Value Delivery

- **2- Welcome Change:** Welcome changing requirements, even late in development. Agile processes harness change for the customer's competitive advantage.

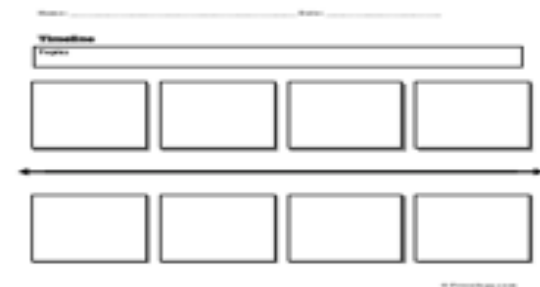

Change for Good

Agile Principles Cont.

- **3- Deliver Working Software Frequently:** Deliver working software frequently, from a *couple of weeks* to a *couple of months*, with a preference for the shorter timescale.

Weeks not Months

Agile Principles Cont.

- **4- Daily Collaboration:** Business people and developers must work together daily throughout the project.

Partner with Business

- **5- Motivated Individuals:** Build projects around motivated individuals. Give them the environment and support they need, and trust them to get the job done.

Motivation and trust

Agile Principles Cont.

- **6- Face-to-Face Communication:** The most effective method of conveying information for a development team is face-to-face conversation.

Direct and Open Communication

- **7- Working Software as Progress:** Working software is the primary measure of progress.

Show and tell

Agile Principles Cont.

- **8- Sustainable Pace:** Agile processes promote sustainable development. The sponsors, developers, and users should be able to maintain a constant pace indefinitely.

Keep it Steady

Agile Principles Cont.

- **9- Technical Excellence:** Continuous attention to technical excellence and good design enhances agility.

Never Compromise the Quality

- **10 Simplicity:** the art of maximizing the amount of work not done - is essential.

Keep It Simple

Agile Principles Cont.

- **11- Self-Organizing Teams:** The best architectures, requirements, and designs emerge from self-organizing teams.

Empower the team

Agile Principles Cont.

- **12- Regular Reflection and Adjustment:** At regular intervals, the team reflects on how to become more effective, then tunes and adjusts its behavior accordingly.

Agile Practices

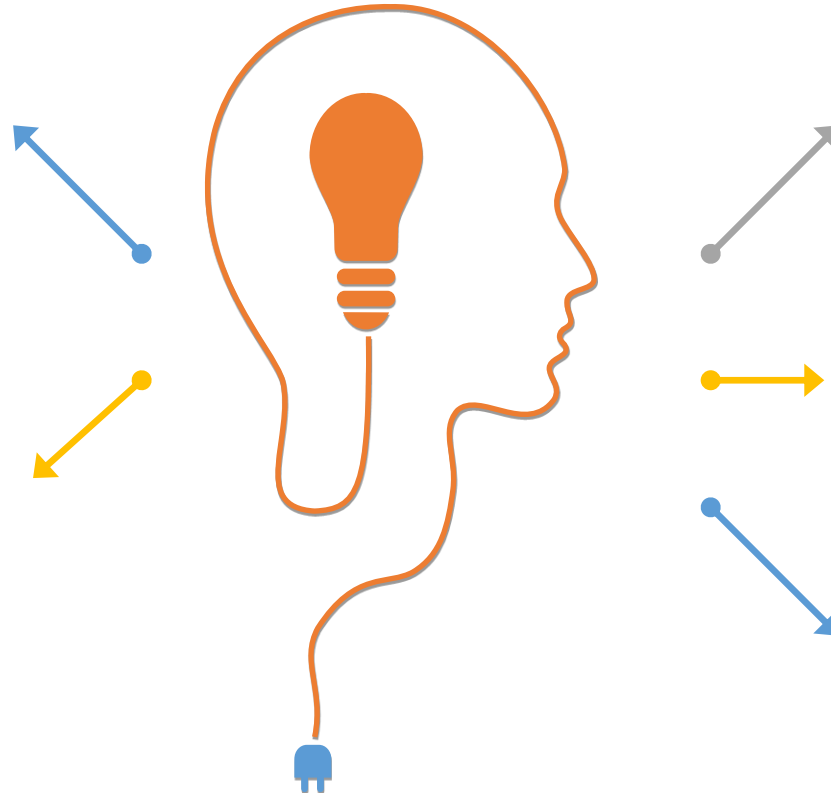

- Agile practices are an ***umbrella term for methods*** that promote flexibility, customer collaboration, iterative development, and self-organizing teams in product development, as outlined in the Agile Manifesto.
- ***Common methodologies*** that embody these practices are Scrum and Kanban, which use iterative cycles to build products and respond to evolving requirements and feedback.

KANBAN

- Kanban is a *Japanese term which means a card*.
- These cards contain *details* of the work to be done on the software.
- The purpose is *visualization*. Every team member is *aware* of the work to be done through these visual aids.
