

Agile Course

Week 04: Agile (Scrum)

Ahmed Kord

Outline

❖ Scrum

❖ Scrum role

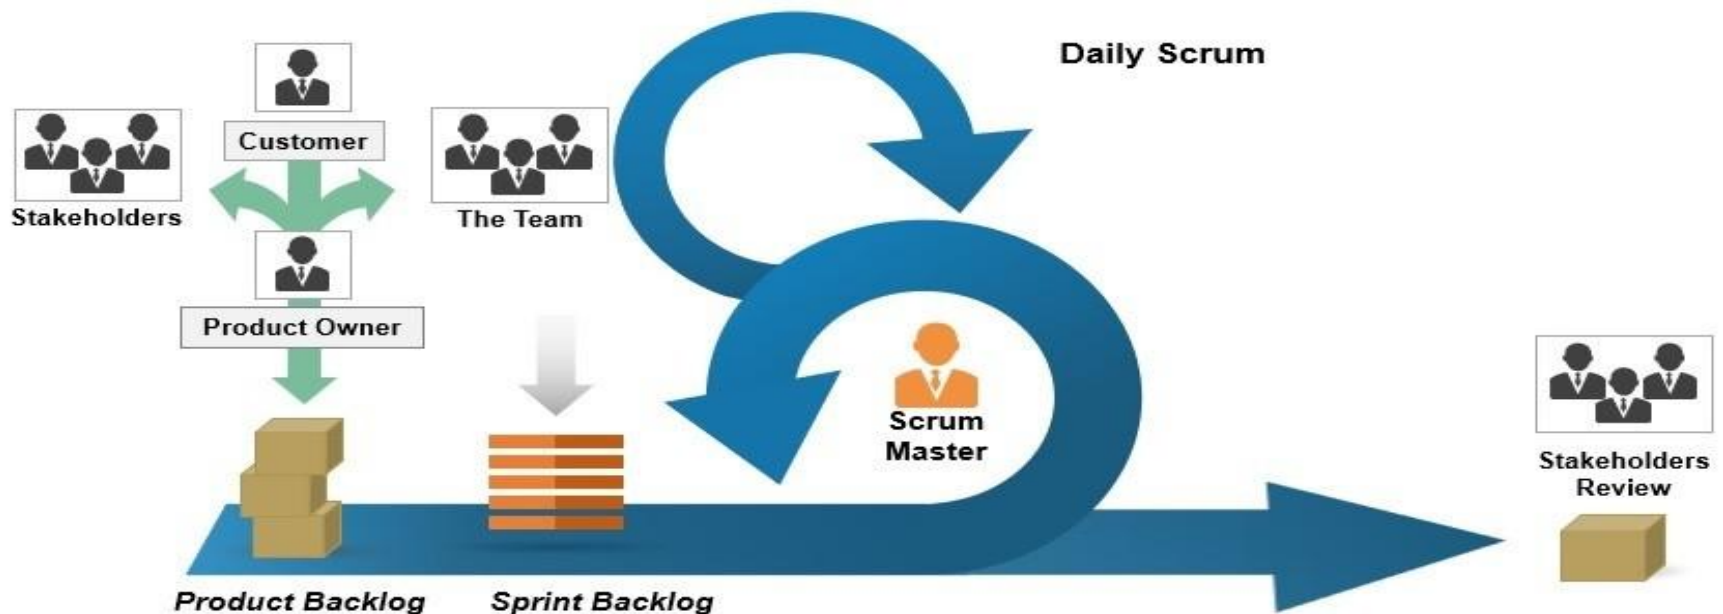

- ❖ Product owner
- ❖ Development team
- ❖ The Scrum Master

❖ Extra Scrum Roles

- ❖ Project sponsor
- ❖ Business leader
- ❖ Senior user
- ❖ Technology leader
- ❖ Agile coach

Scrum

- Scrum framework is a very **lightweight framework** that was designed by agilist to **solve complex adaptive problems** that require **sprinting or iterating** through a solution.

Outline

❖ Scrum

❖ Scrum role

- ❖ Product owner
- ❖ Development team
- ❖ The Scrum Master

❖ Extra Scrum Roles

- ❖ Project sponsor
- ❖ Business leader
- ❖ Senior user
- ❖ Technology leader
- ❖ Agile coach

Scrum Role

PRODUCT OWNER

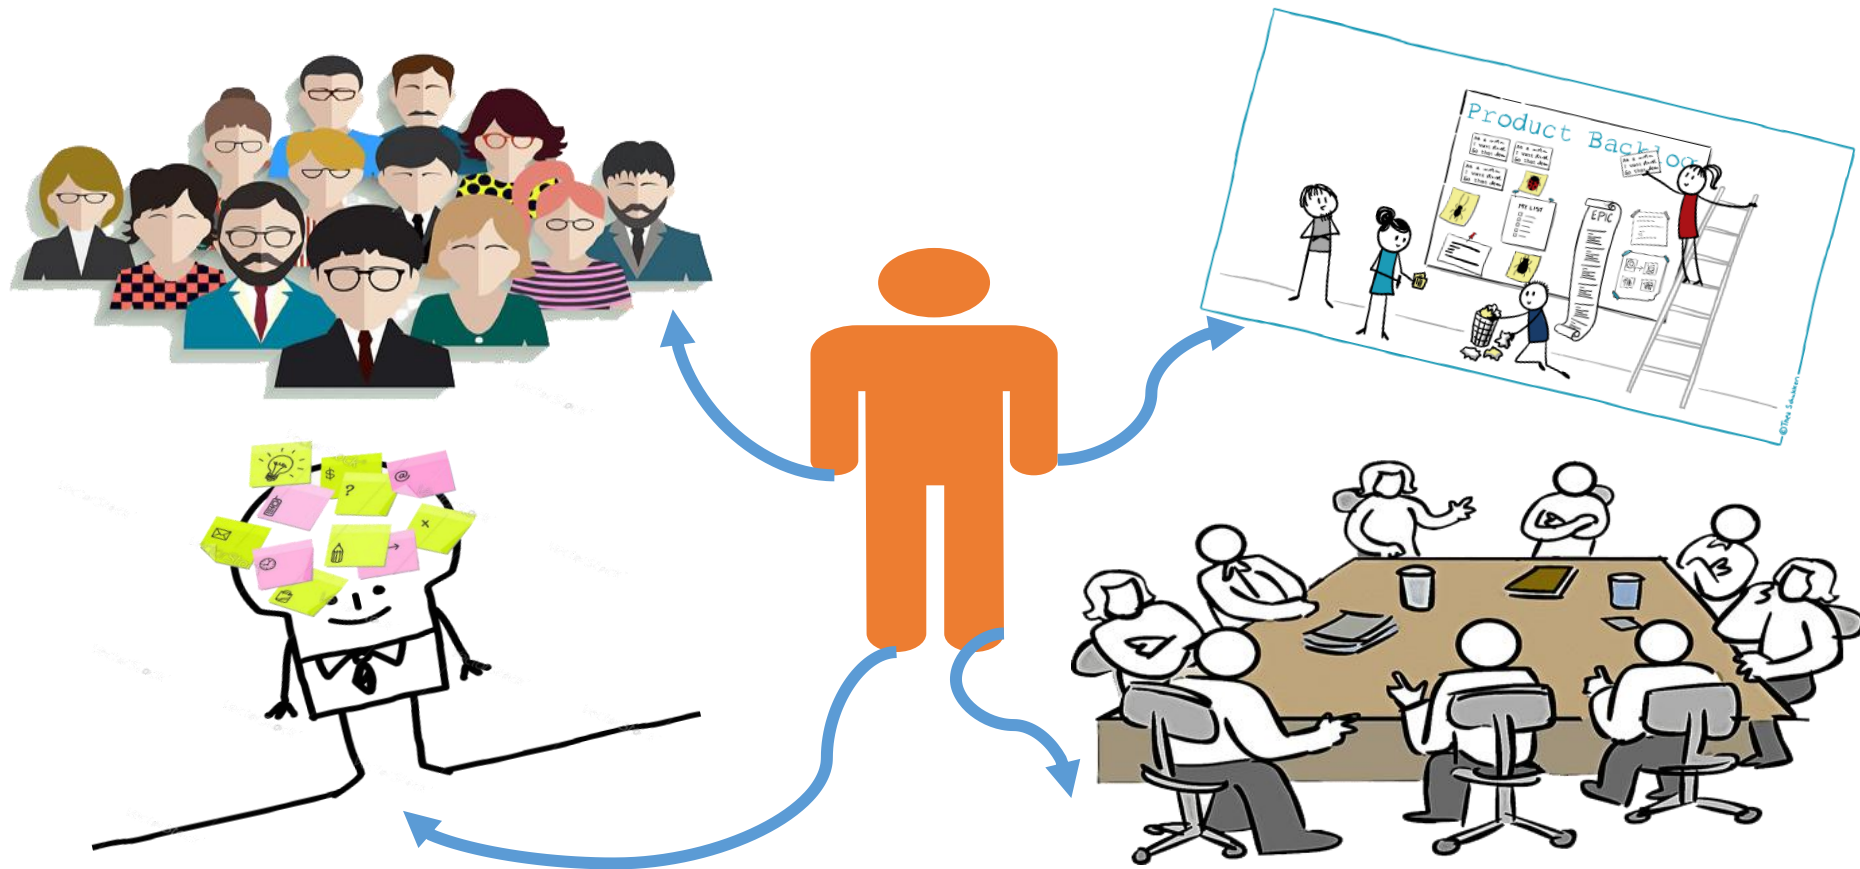

TEAM

SCRUM MASTER

Product owner

Product owner

- **Talk** to the **stakeholders or the users** and **understand** the **product vision** from them, understand their challenges and what kind of problem they are trying to solve.
- **Comes back** to the **team and helps the team understand what are some of the needs and the challenges** that the team will be solving with the product that they are developing.
- Writes this very simple description of a feature from an end users perspective. **“User story”**
- Responsible for managing the **Product Backlog**.

Product owner Cont.

❖ **Product Backlog management includes:**

- 1- Clearly expressing **Product Backlog items;**
- 2- **Ordering the items** in the Product Backlog to best achieve goals and missions;
- 3- Optimizing the value of the work the Development Team performs;
- **Ensuring that the Product Backlog** is **visible**, transparent, and **clear** to all, and shows what the Scrum Team will work on next; and,
- **Ensuring** the Development Team **understands** items in the Product Backlog to the level needed.

Development team

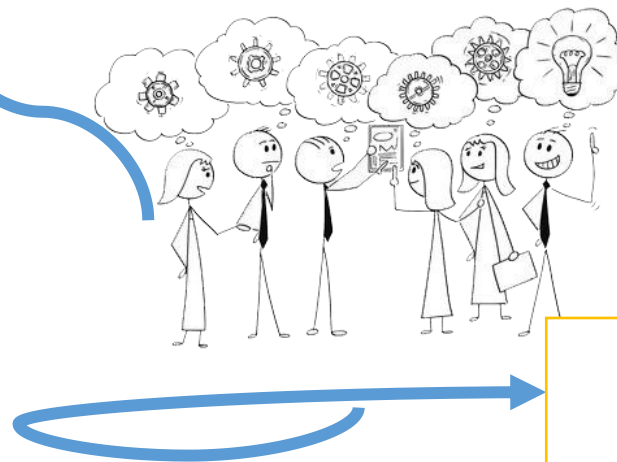

- The ***Development Team consists of professionals*** who do the work of delivering a potentially releasable Increment of “Done” product at the end of each Sprint.

Development team Cont.

self-organizing

Cross functional

No sub-teams

Development team Cont.

- 1- They are self-organizing .
 - *No one (not even the Scrum Master)* tells the Development Team how to turn Product Backlog into Increments of potentially releasable functionality.
- 2- Development Teams are *cross-functional* sa sliks eht fo lla htiw , tnemercnI tcudorp a etaerc ot yrassedecen maet a.
- 4- Scrum recognizes *no sub-teams* ,maeT tnempoleveD eht ni ekil desserdda eb ot deen taht sniamod ralucitrap fo sseldrager ;elur siht ot snoitpecxe on era ereht ;sisylana ssenisub ro gnitset

The Scrum Master

- The Scrum Master is responsible for ***ensuring Scrum is understood and enacted.*** Scrum Masters do this by ensuring that the Scrum Team adheres to Scrum theory, practices, and rules.

The Scrum Master Cont.

Scrum master

Product Owner

The Scrum Master Cont.

- The Scrum Master serves the Product Owner in several ways, including:
 - *Finding techniques* for effective Product Backlog management;
 - *Ensuring the Product Owner knows* how to arrange the Product Backlog to maximize value;
 - Understanding and practicing agility; and,
 - *Facilitating Scrum events* as requested

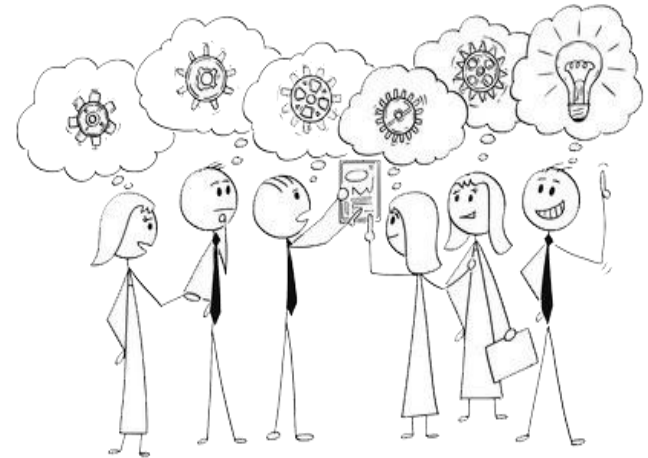

The Scrum Master Cont.

Scrum master

Development team

The Scrum Master Cont.

- The Scrum Master serves the Development Team in several ways, including:
 - Coaching the Development Team in self-organization and cross functionality,
 - Helping the Development Team to create high-value products, Removing impediments to the Development Team's progress;
 - Facilitating Scrum events as requested or needed; and,
 - Coaching the Development Team in organizational environments in which Scrum is not yet fully adopted and understood.

Outline

❖ Scrum

❖ Scrum role

- ❖ Product owner
- ❖ Development team
- ❖ The Scrum Master

❖ Extra Scrum Roles

- ❖ Project sponsor
- ❖ Business leader
- ❖ Senior user
- ❖ Technology leader
- ❖ Agile coach

Extra Scrum Roles

Business leader

Technology leader

Project sponsor

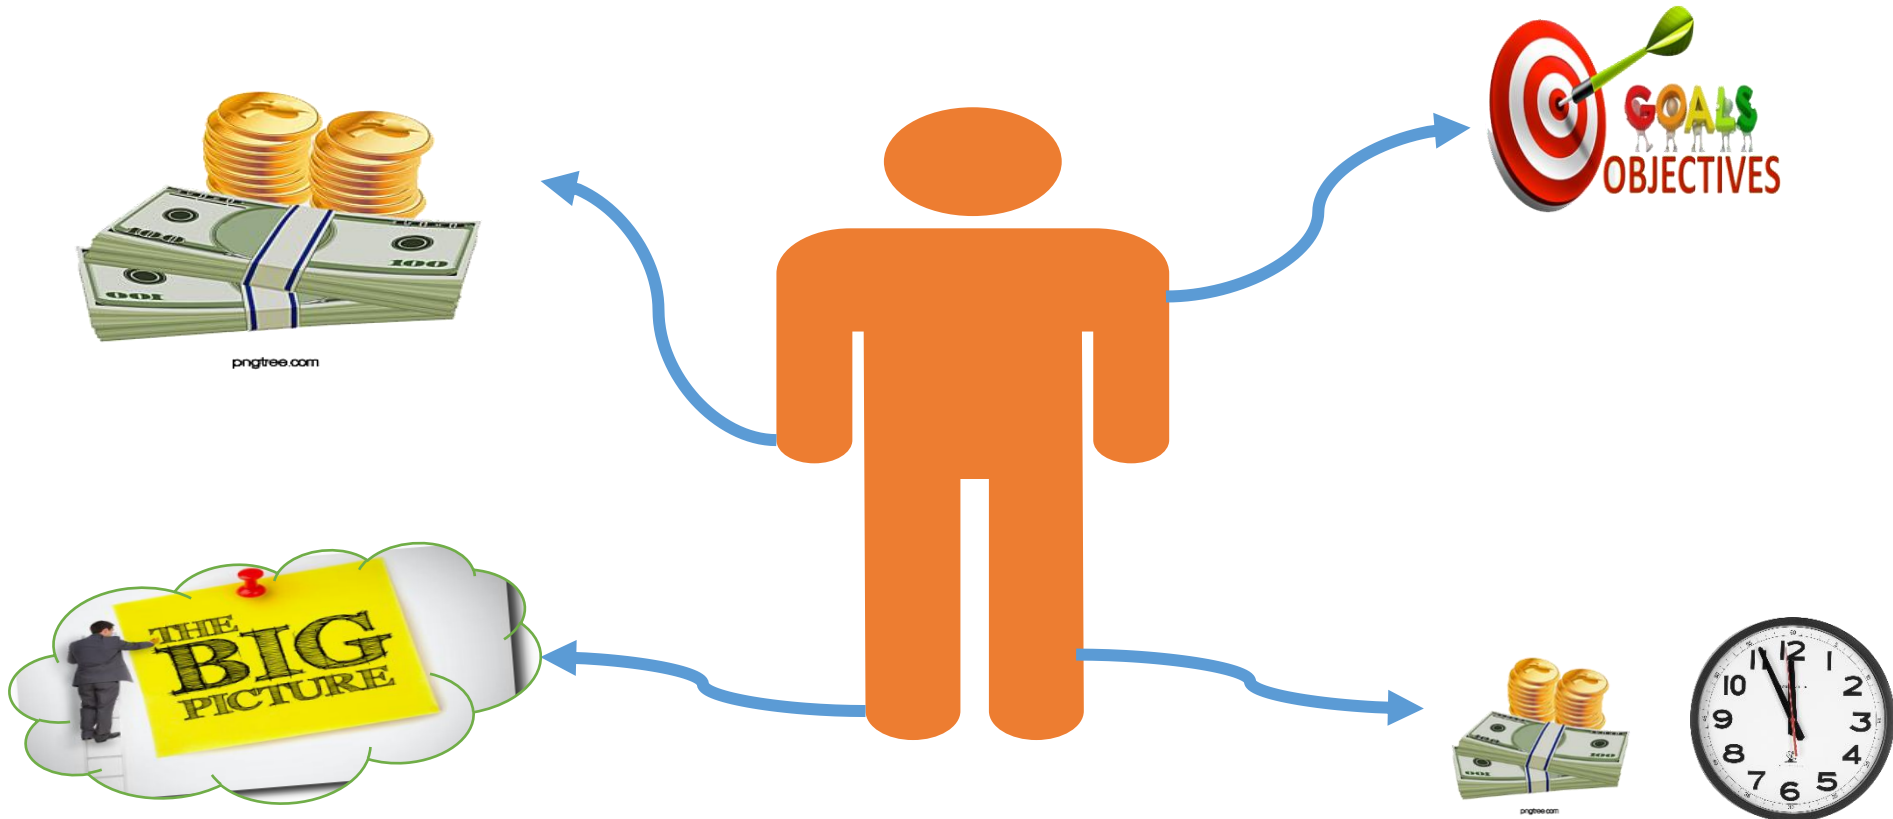

Senior user

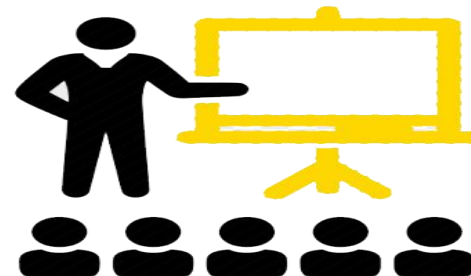

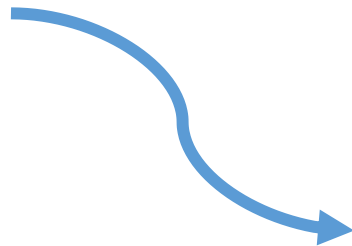

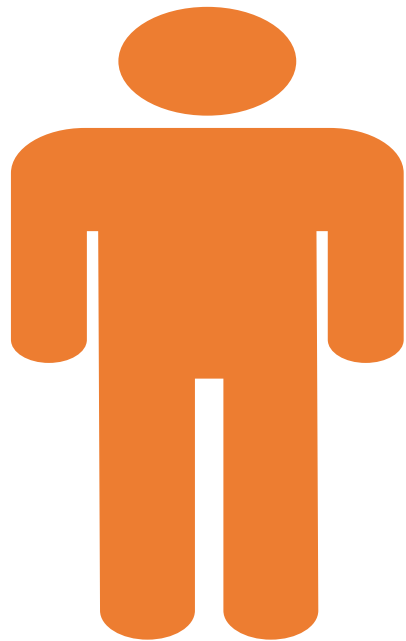

Agile coach

Project sponsor

Project sponsor Cont.

Project sponsor Cont.

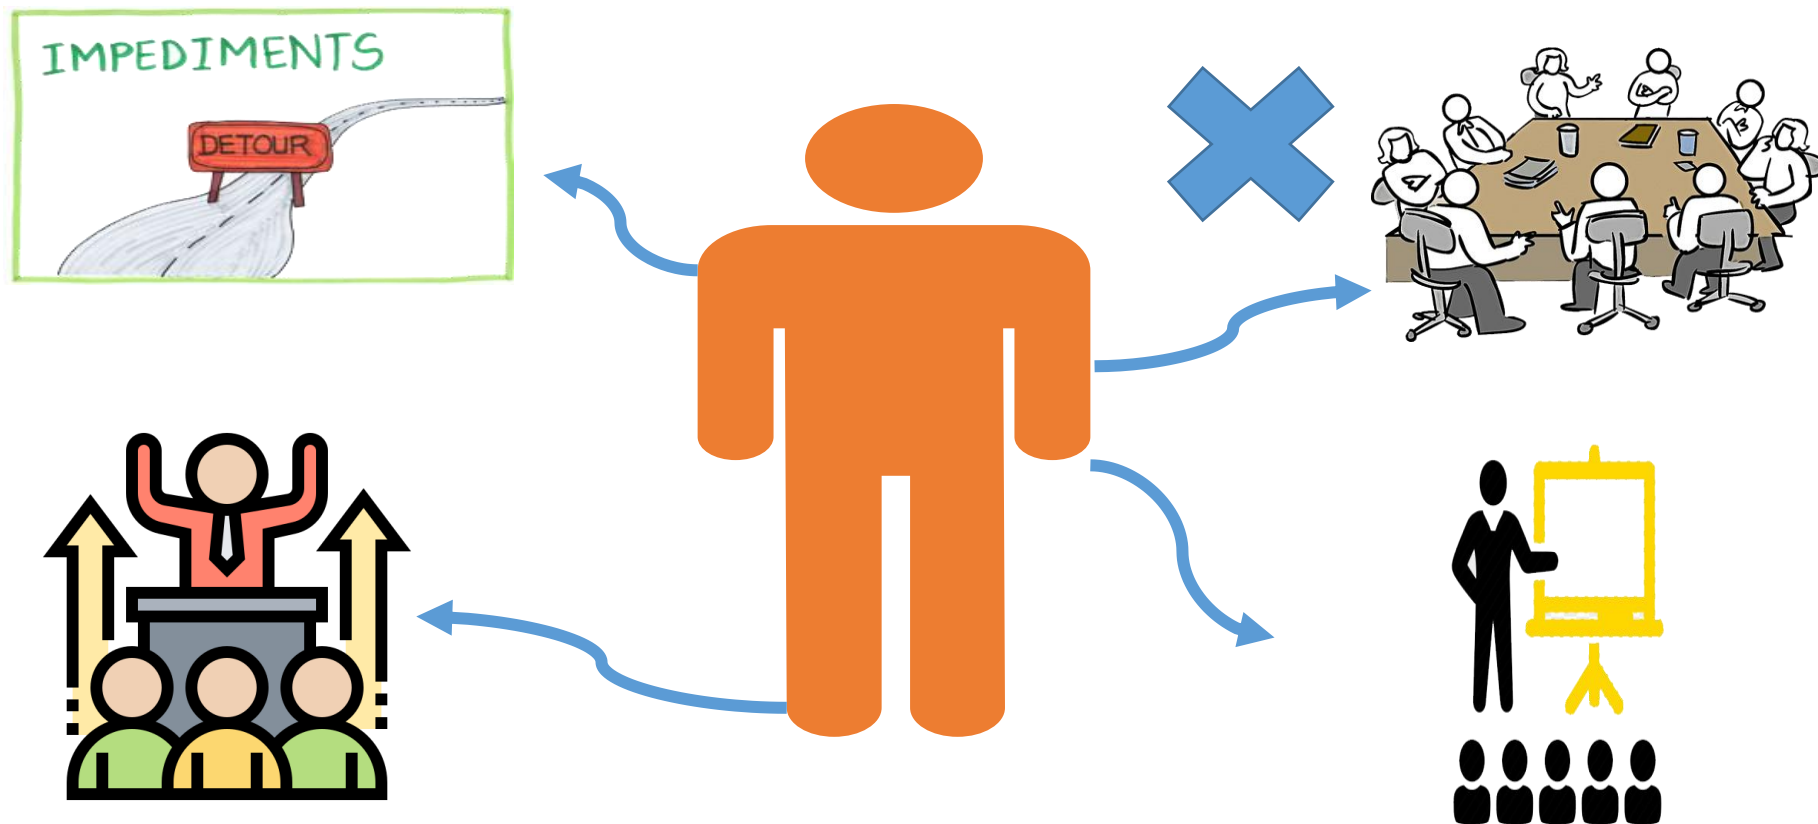

- Their main objective is to approve that project and the budget.
- They're the one that has the idea of the big picture and they are saying that this solution is going to provide value to the business or the organization.
- We want them to invest their time and money to move forward and achieve that solution.
- They are helping to shape the project need and the outcomes.
- A Project Sponsor aligned with the company objectives and their goals and kind of the vision of the company and where it's going.

Project sponsor Cont.

- Project Sponsors are also there to ensure that that project stays aligned to those company objectives.
- From an Agile meeting perspective:
- Project Sponsor isn't expected to go to all the various ceremonies on a Sprint basis.
- Instead, the big ones that they should be participating in are the Sprint Reviews or other feedback demos.

Business leader

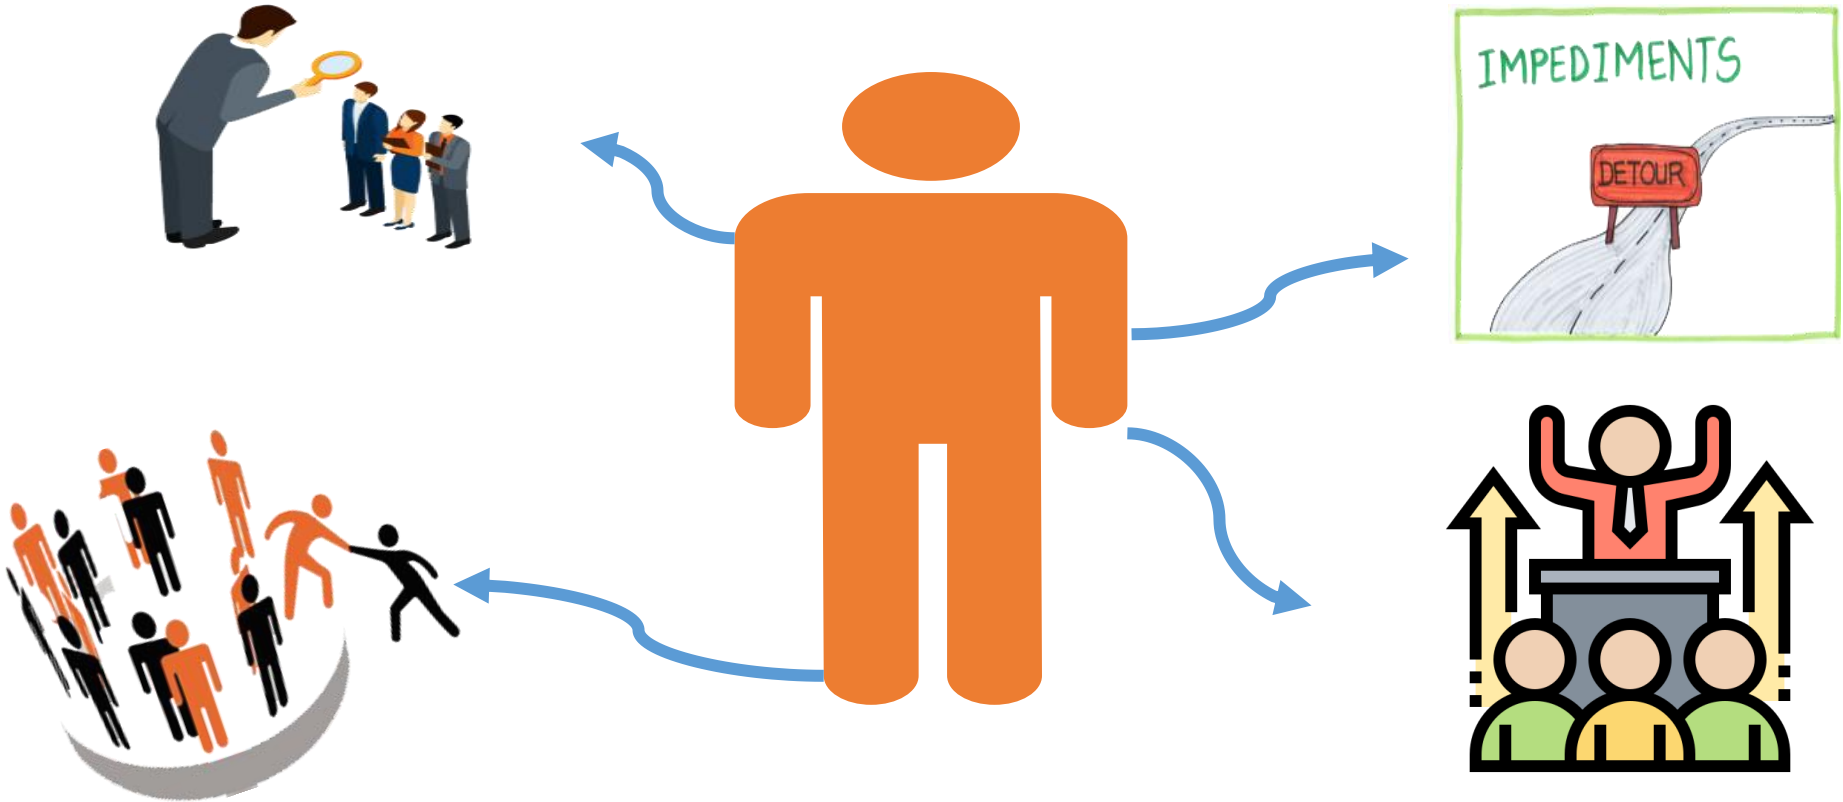

Business leader Cont.

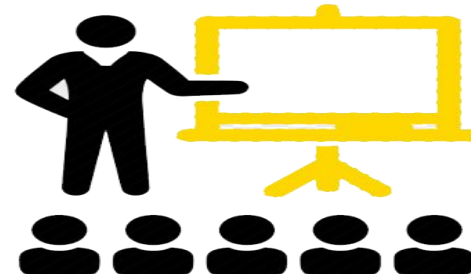

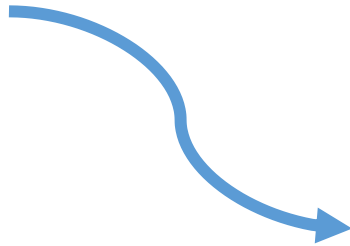

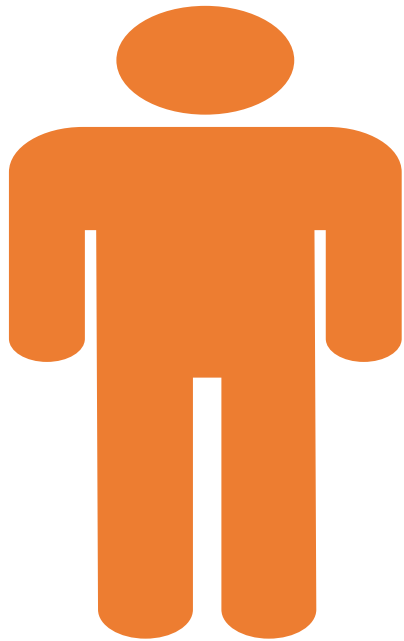

- Business Leader is called Business Management or Business Executives, within the organization.
- Business Leaders help to resolve a lot of impediments or at least help escalate the resolution of various impediments.
- It's really important for Business Leaders, to participate in Sprint Reviews as well as other feedback demos that may be scheduled.
- Business Leaders are encouraging the cross-team and cross-department collaboration as kind of tying it into the enabling access to the business resources.

Technology leader

Technology leader Cont.

Technology leader Cont.

- IT managers, directors or executives of technology.
- Responsible for hiring the right team members with the right skill-sets in Agile.
- Making sure that those team members will be able to fit within the team and collaborate and work with the team.
- Needs to empower trust and support the team.

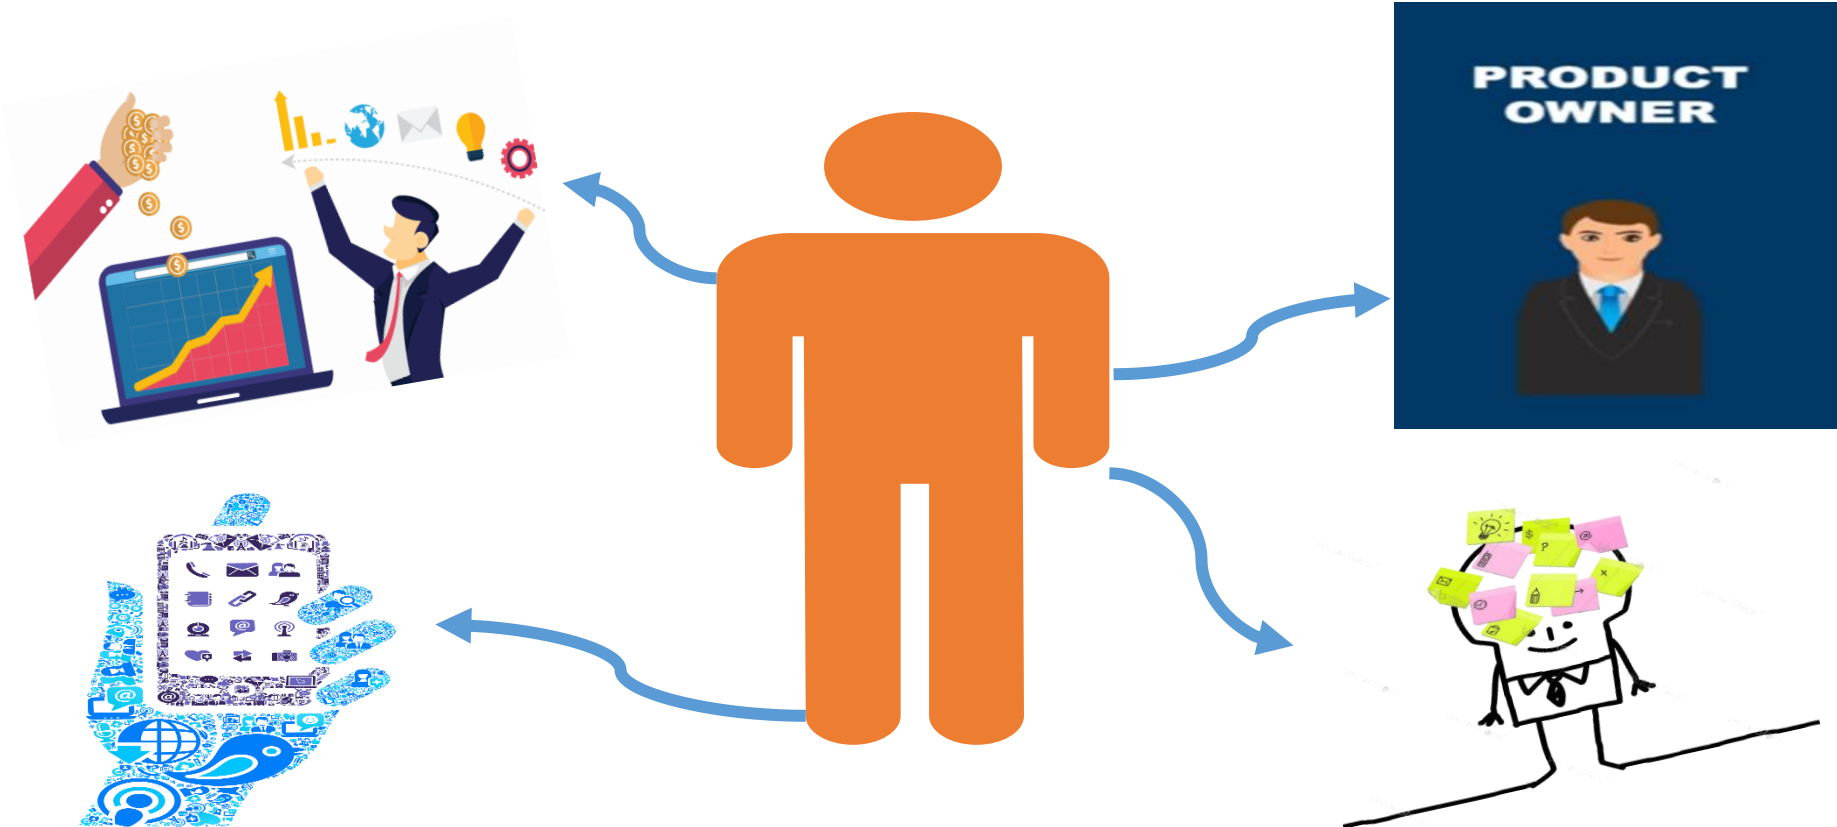

Technology leader Cont.

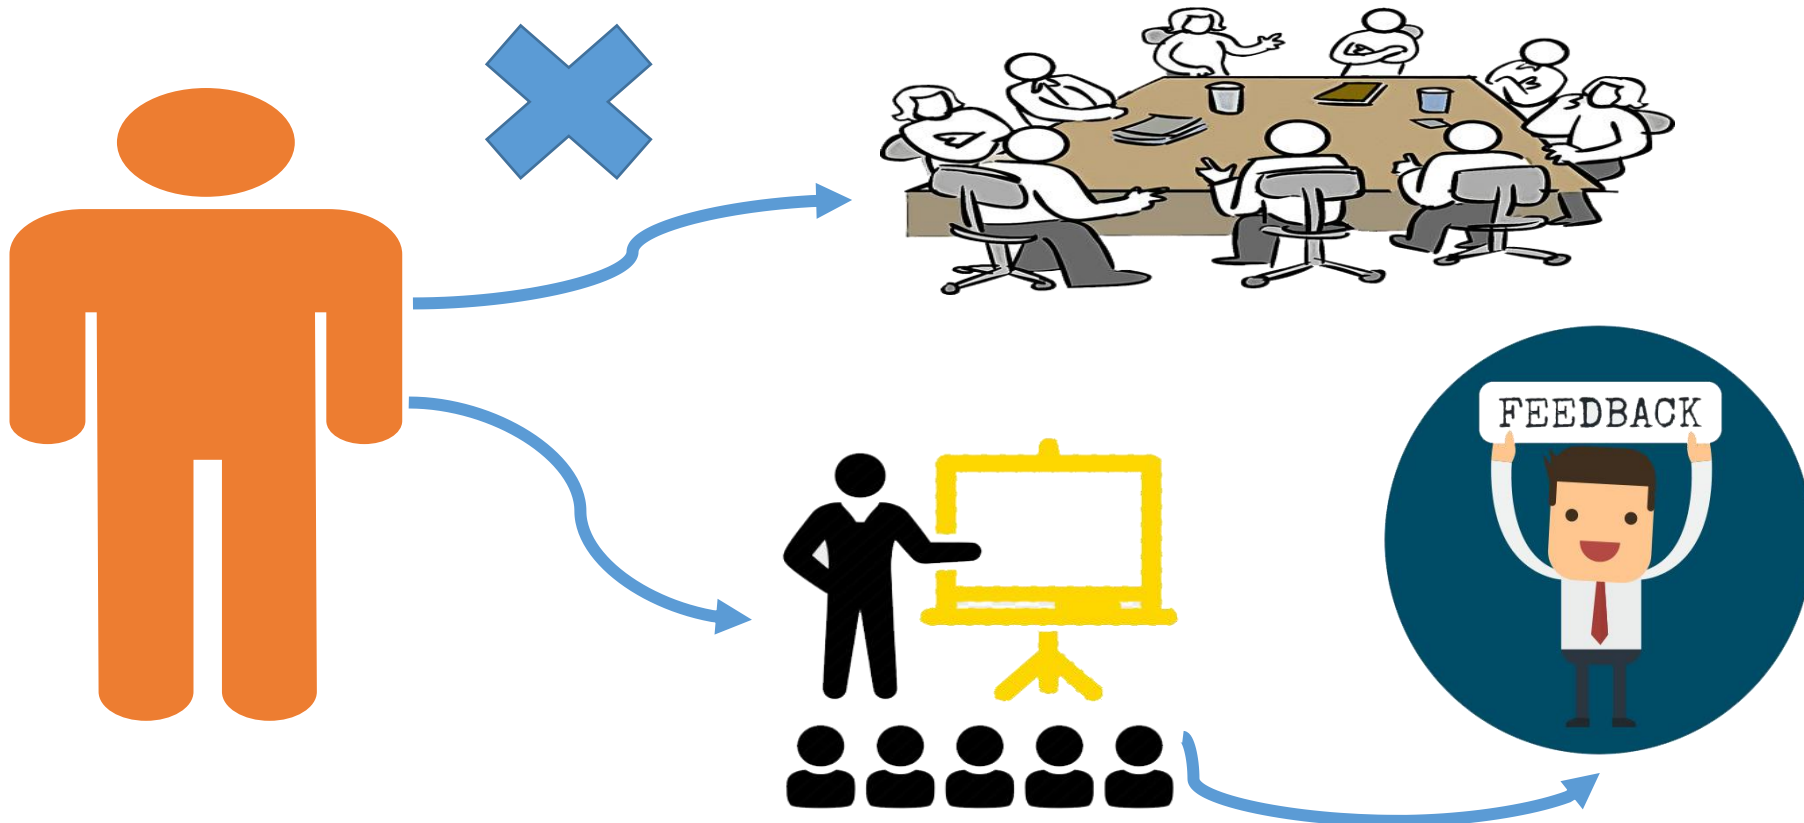

- They're also escalating any type of impediment resolutions that are needed, with their various contacts or using their pull within the organization.
- They're also participating in Sprint Reviews and other feedback demos.
- They're also there to encourage that cross-team, cross-department collaboration.

Senior user

Senior user Cont.

Senior user Cont.

- People on the business side, that have been working in that industry, working in that business for a while.
- They know the technology, and or they know the processes, and or they know the industry and the business.
- Really helping that Product Owner understand, what the needs are of the organization, of those users of the organization, and helping them to shape that business vision.

Senior user Cont.

- Also, participating in those Sprint Reviews and feedback demos.
- They are there and can provide their feedback, to help shape that solution on that same note, they should be providing continuous feedback on product deliverables.
- And finally they helping to *make sure that the user story results are being used properly.*

Business user

- Similar to the Senior Users, the Business Users are helping to provide their needs.
- They're helping to give context and perspective, It's very important if the Agile team for inviting various Business Users to feedback demos.
- And that's really just, to make sure that you're using the product deliverables appropriately to create the value, that was determined as part of the whole project.

Agile coach

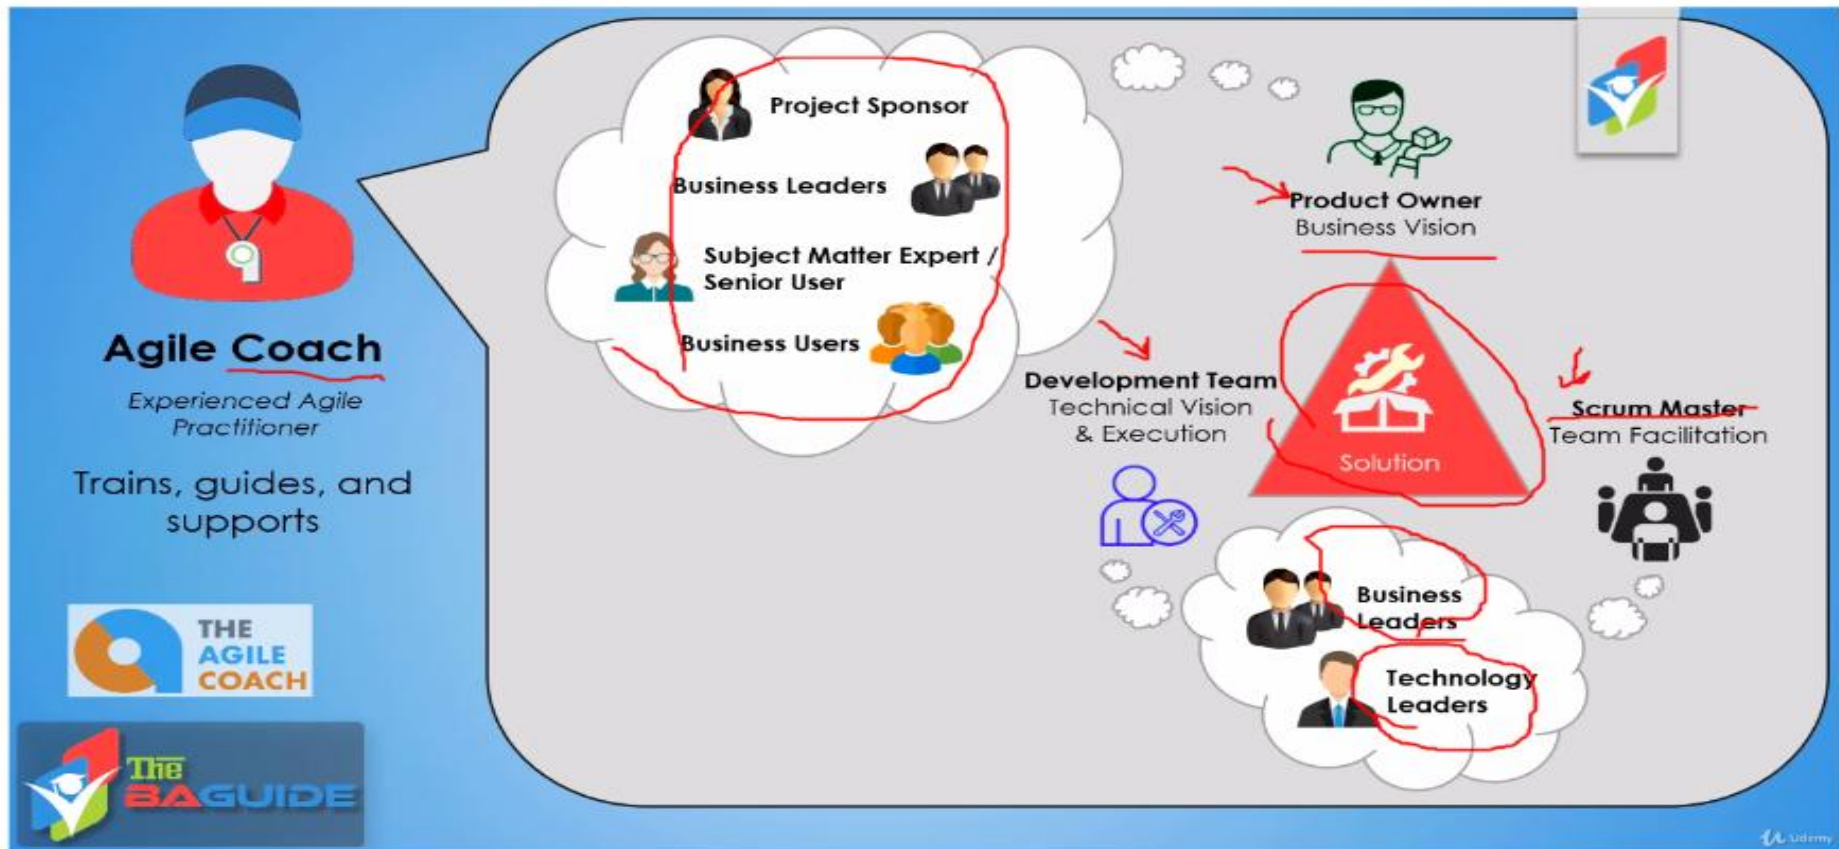

- The Agile coach is an experienced Agile practitioner.
- This could be a consultant, it could be somebody that works within the organization.
- They're there to help train, guide and support the full Agile for the organization.
- They understand the ceremonies.
- They understand the terms.
- They understand the roles and responsibilities.

Agile coach Cont.

- So they're helping everyone, all those various roles know, what their roles and responsibilities are within the various aspects of the project.
- They're also ensuring that the ceremonies that are being done, are done correctly according to the guidelines that the Agile values.
- And principles are being upheld within the organization.
- So a lot of times, an Agile coach is brought in making sure that everybody knows, what they're doing and point out any type of issues or changes that need to be made, for the organization to be better from an Agile perspective or just better from an overall perspective.

Agile coach Cont.

Thank You
