

Q.1) Choose the right answers and label it in your answer sheet (50 x 1 Marks)

1. _____ UML diagram has a static view.
A). Collaboration B). Use case C). State chart D). Activity
2. which type they considered Activity diagram, use case diagram, collaboration diagram, and sequence diagram?
A). non-behavioral B). non-structural C). structural D). behavioral
3. Which of the following UML diagrams is time oriented?
A). Usecase diagram B). Activity Diagram C). Sequence diagram D). Class diagram
4. A _____ in C# is used to describe a model.
A). Method B). Class C). Parameter D). Object
5. In ASP.NET MVC, _____ handles incoming browser requests, Retrieves necessary model data and Returns appropriate responses.
A). Model B). View C). Controller D). Action
6. _____ method is a default action method for any controller.
A). Home() B). About() C). Contact() D). Index()
7. Which of the following is the base class that can be the return type of action method that returns any result?
A). ViewResult B). ContentResult C). ActionResult D). JavaScriptResult
8. Action method can NOT be _____.
A). Overloaded B). Public C). Static D). Both A and C are true
9. MVC architecture separates an application into three components: _____.
A). Mode-Version-Controller B). Model- View-Collection C). Model-View-Controller D). Mode-View-Center
10. _____ objects store data retrieved from the database.
A). Controller B). Model C). View D). Action
11. In a Business Model Canvas, programming tools and high qualified computers are examples for _____.
A). Key Resources B). Key Activities C). Channels D). Key Partners
12. In a Business Model Canvas, website and social media applications are examples for _____.
A). Key Partners B). Key Activities C). Channels D). Customer Segments
13. Patients in a medical business can be classigied as _____ in a Business Canvas Model.
A). Key Partners B). Customer Segments C). Key Resources D). Key Activities
14. While creating a Business Model Canvas to manage a data center or a business, _____ refers to: The network of suppliers who complement each other in helping the company create its value proposition.
A). Customer segments B). Key resources C). Key partners D). None of the above is true
15. Which of the following is an example of a strengths in SWOT Analysis?
A). High Qualified staff B). High business experience C). Loyal customers to brand name D). All of them are true
16. Which of the following is NOT an example of a weakness in SWOT Analysis?

not weakness

- A). Outdated inventory management software ☒ B). High prices of my products C). Expensive materials and Fabrics ✓ D). Low marketing budgets ✓
17. In data center management and business Analysis, _____ is a one page plan outlining your new business idea.
A). SWOT Analysis B). Activity Diagram C). Data Flow Diagram ☒ D). Business Canvas Model
18. SWOT analysis is an appreviation for
A). study, weakness, opportunity,threat ☒ B). strength, weakness, opportunity,threat C). strength, weakness, object ,treat D). strength, weakness, object ,threat
19. _____ schedule regular meetings to update the team and discuss project status, issues, problems, and opportunities.
A). Tester ☒ B). project manager C). Analyst D). Developer
20. _____ programmers will use it to transform the logical design into program modules and code
A). UML B). Use Case Diagram ☒ C). application architecture D). Sequence diagram
21. The deliverable for the systems design phase is the _____.
A). system requirements document. ☒ B). System Design Specification C). Functioning System D). Fully Operational System
22. The deliverable for the systems analysis phase is the _____.
☒ A). system requirements document. B). System Design Specification C). Functioning System D). Fully Operational System
23. _____ one of most viable models for SDLC uses various symbols and shapes to represent data flow, processing, and storage
A). State Machine diagram B). Class Diagram C). Use Case ☒ D). DFD
24. _____ is a traditional systems development technique that is time-tested and easy to understand.
☒ A). Structured Analysis B). OOA C). Agile Analysis D). RAD
25. Imagine building a house what is the phase of SDLC an considering not a step of creating a house, but it's necessary for the health and to keep the project in a strategic fit.
A). Analysis ☒ B). Planning C). Support and Security D). Design
26. An _____ is a recognizable reference point that can be used to monitor progress.
A). task ☒ B). milestone C). activity D). user story
27. A _____ is any work that has a beginning and an end and requires the use of company resources such as people, time, or money.
☒ A). task B). milestone ✗ C). event ✗ D). user story
28. _____ is a bottom -up technique because it analyzes a large, complex project as a series of individual tasks.
A). WBS ☒ B). Pert/CPM C). Gantt Chart D). Fishbone

29. Gantt chart lists the tasks to be performed on the _____ axis, and time intervals on the _____ axis.
 A). horizontal-vertical B). horizontal-horizontal C). vertical-vertical ☒ D). vertical-horizontal
30. _____ can simplify a complex project by combining several activities into a task group that contains subsidiary tasks.
☒ A). WBS ☒ B). Pert/CPM C). Burn down D). Fishbone
31. A _____ is a horizontal bar figure that represents a set of tasks.
 A). WBS ☒ B). Pert/CPM C). Burn down ☒ D). Fishbone
32. A _____ involves breaking a project down into a series of smaller tasks.
☒ A). WBS B). Pert/CPM C). Burn down D). Fishbone
33. _____ include users who rely on transaction processing systems to enter and receive data they need to perform their jobs.
 A). Top Managers ☒ B). Operational C). Middle Managers D). Knowledge Workers
34. _____ provide direction, necessary resources, and performance feedback to supervisors and team leaders.
 A). Top Managers B). Operational ☒ C). Middle Managers D). Users
35. _____ also is called looping.
 A). Sequence ☒ B). Iteration C). Selection D). Mutate
36. _____ develop long-range plans, called strategic plans, which define the company's overall mission and goals.
☒ A). Top Managers B). Operational C). Middle Managers D). Users
37. Top Managers develop long-range plans, called _____, which define the company's overall mission and goals.
 A). Current Plan B). Business Model Canvas ☒ C). Strategic Plan D). Routine Plan
38. Effective _____ requires strong communication skills and a sense of what others want and need to know about the project.
 A). Planning B). Scheduling C). Monitoring ☒ D). Reporting
39. The project management phase that project manager can extract and evaluate reports to management, users, and the project team itself
 A). Planning B). Scheduling C). Monitoring ☒ D). Reporting
40. The project management phase that project manager can create of a specific timetable and use Gantt charts and PERT/CPM charts
 A). Planning ☒ B). Scheduling C). Monitoring D). Reporting
41. The project management phase that project manager can identify all project tasks and estimate the completion time and cost of each.
☒ A). Planning B). Scheduling C). Monitoring D). Reporting
42. Systems development projects tend to be _____ because you can't control every leg of project.
 A). agile B). obsolete ☒ C). dynamic D). fast
43. If you need it good and cheap, you would make it _____.
☒ A). not fast B). fast C). scaled D). not scaled
44. If you need it good and fast, you would make it _____.

good
cheap
fast

45. If you need it cheap and fast, you would make it _____.
 A). scaled B). cheap ☒ C). expensive D). not scaled
46. _____ is someone who is responsible for overseeing all relevant tasks.
☒ A). not good B). good C). scaled D). not scaled
47. _____ Sets of inter-related procedures using IT infrastructure in a business enterprise to generate and disseminate desired information.
 A). Tester ☒ B). project manager C). Analyst D). Developer
48. The completion of steps in sequential order, one after another. Called _____.
☒ A). BIS B). MIS C). KMS D). CMS
49. _____ consists of everything in the physical layer of the information system
☒ A). Sequence B). Iteration C). Selection D). Mutate
50. It is a problem solving technique that improves the system and ensures that all the components of the system work efficiently to accomplish their purpose.
☒ A). Hardware B). Software C). People D). Procedures
51. It is a problem solving technique that improves the system and ensures that all the components of the system work efficiently to accomplish their purpose.
 A). Implementation B). Design ☒ C). Analysis D). Planning

Q2 True-False Questions 10 x 1 Marks)

1. RAD helps a development team design a system that requires a highly interactive or complex user interface.
☒ True ☐ False
2. RAD stresses the mechanics of the system itself and does not emphasize the company's strategic business needs. A system might work well in the short term.
☒ True ☐ False
3. JAD allows key users to participate effectively in the requirements modeling process.
☒ True ☐ False
4. JAD is more expensive and can be cumbersome if the group is too large relative to the size of the project.
☒ True ☐ False
5. A decision table is a logical structure that shows every combination of conditions and outcomes.
☒ True ☐ False
6. When you design the DFD Use unique names within each set of symbols
☒ True ☐ False
7. A DFD shows only External entity that provide data to the system or receive output from the system.
☒ True ☐ False
8. A logical model shows what the system must do, regardless of how it will be implemented physically.
☒ True ☐ False
9. Preliminary investigation is an important fact-finding tool during the systems analysis phase. is a planned meeting during which the analyst obtains information from another person.
☐ True ☒ False
10. fact finding means Collecting Information using interviewes or other techniques.
☒ True ☐ False
