

 Midterm Style MCQs – Lecture 3 (Web Engineering)

1- delivery allows managing frequent changes in WebApp development.

- A) Linear
 - B) Incremental**
 - C) Waterfall
-

2- The Web Engineering process must be agile and

- A) rigid
 - B) adaptable**
 - C) sequential
-

3- Requirements evolve over time, therefore the WebE process should be

- A) incremental**
 - B) static
 - C) fixed
-

4- Each WebApp increment starts with the activity.

- A) Construction
 - B) Communication**
 - C) Deployment
-

5- defines the business and organizational context for the WebApp.

- A) Elicitation
 - B) Negotiation
 - C) Formulation**
-

6- Requirements-gathering and identifying areas of uncertainty occur during

- A) Formulation
 - B) Elicitation**
 - C) Planning
-

7- Reconciling differences between stakeholders is done in

- A) Negotiation**
 - B) Modeling
 - C) Deployment
-

8- Identifying the number of WebApp increments is part of

- A) Planning**
 - B) Modeling
 - C) Construction
-

9- Developing analysis and design models for the WebApp is done in

- A) Planning
 - B) Modeling**
 - C) Deployment
-

10- Coding and testing activities are performed during

- A) Construction**
 - B) Modeling
 - C) Communication
-

11- Configuring the WebApp for its operational environment occurs in

- A) Construction
- B) Deployment**
- C) Planning

12- Feedback from end users is mainly collected during

- A) Modeling
 - B) Deployment**
 - C) Construction
-

13- Change management, quality assurance, and risk management are called

- A) Core activities
 - B) Framework activities
 - C) Umbrella activities**
-

14- The umbrella activity concerned with managing the effects of change is

- A) Quality assurance
 - B) Change management**
 - C) Project management
-

15- Ensuring that each increment exhibits quality is the role of

- A) Risk management
 - B) Quality assurance**
 - C) Planning
-

16- Identifying and assessing project and technical risks is part of

- A) Risk management**
 - B) Change management
 - C) Deployment
-

17- Tracking and monitoring progress during development is done by

- A) Quality assurance
 - B) Project management**
 - C) Communication
-

18- In incremental development, each increment goes through the process cycle.

- A) a different
 - B) the same**
 - C) a simplified
-

19- An informational WebApp mainly contains

- A) complex transactions
 - B) read-only content**
 - C) user authentication
-

20- Short timelines in Web development make delivery essential.

- A) waterfall
 - B) incremental**
 - C) spiral
-

21- Stakeholders are mainly involved during the activity.

- A) Communication**
 - B) Construction
 - C) Deployment
-

22- Estimating resources and considering risks are tasks performed during

- A) Modeling
 - B) Planning**
 - C) Construction
-

23- Rapid tests are conducted during the activity.

- A) Construction**
 - B) Deployment
 - C) Communication
-

24- The WebE process framework must be adapted to the problem, project, and

- A) technology only
 - B) people involved**
 - C) tools used
-

25- Delivering a complete WebApp through several increments helps manage

- A) documentation
- B) change**
- C) cost only
