

Question 1- Choose Correct Answer [40 Marks]

part 1.1- Choose (A) for (True), and (B) for (False)

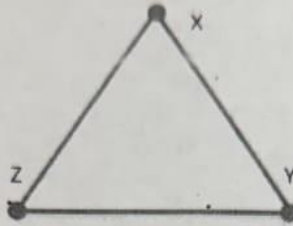

1. In Open-Source Software, User has the **freedom** to run the program for **any** purpose.
A) True B) False
2. In **Open Source** Software, User has the freedom to **redistribute** copies to other users **without waiting** for a copyright permission. T
3. In **GPL** license, Licensees can **modify** the work. T
4. A **Texture** is a **point** with 3D position in the coordinate system F
5. A **quad** face contains **5** vertices F
6. **FBX** is one of the most used 3d formats. T
7. in **Rigging**, Parent and Child objects **don't always** have to be **connected**. T
8. The **Directional** light emits **parallel** rays that seem like **sun** T
9. In **Natron**, the **(Merge)** node is used to **open** a video file from your files F
10. the **root** folder of **linux** file system has the symbol **(X)** F
11. **Linux** is an **Open-Source** Operating System T
12. Image **resolution** is the **total** number of pixels in image (**width * height**) T

part 1.2- Choose the Correct Answer

13. The git ____ command adds a **change** in the working directory to the **staging** area.
A) ignore B) branch C) add
14. in git, the ____ command can be used to know all file **modifications not yet staged** for commit
A) delete B) status C) clone
15. ____ color model is a **subtractive** color model
A) RGB B) CYMK C) TSCH
16. If the colors of an image design are all of the **same hues** (main color), then this design applies ____ color scheme
A) Monochromatic B) Complementary C) Triadic
17. ____ image format results in **large** files (**uncompressed**), and it was used mostly for **printing**
A) BMP B) SVG C) GIF
18. In order to **group** several **SVG tags** (elements) in one group, we can use ____ tag
A) d B) h C) g
19. the ____ in audio signal is the Point that exhibits **maximum** amount of **downward** displacement from the **rest** position.
A) Frequency B) Trough C) Bit Rate
20. ____ refers to when a collection of **2D sprites** or **layers** of sprites are made to move **independently** of each other and/or the **background** to create a sense of **depth** (3rd dimension)
A) MP4 B) hitbox C) Parallax
21. Which of the following is the **most accurate** **الأدق** collision detection hit box?
A) Pixel perfect B) Box C) Circle

MODEL -1 النموذج الأول

22. Which of the following mesh faces is always guaranteed to be planar?
☒ A) Triangle B) Quad C) N-GON
23. In the following figure, a face contains 3 points X, Y and Z. which winding order is considered (counter-clockwise)

- A) Y, X, Z B) Y, Z, X ☒ C) X, Y, Z
24. In UV mapping, U and V values range from 0 to ____
☒ A) 1 B) 10 C) 100
25. In ____ animation principle, the designer draws all frames in sequential order (one-by-one)
☒ A) Pose-to-pose B) Straight-ahead C) Arc
26. In Filmmaking Pipeline, the ____ step is done mainly in post-production
☒ A) Brainstorming B) Scripting C) Video editing
27. Which of the following lights in Three-Point Lighting is the most intense (powerful) ?
☒ A) Key B) fill C) Rim
28. The linux command allows user to execute admin (root) important commands
☒ A) ls B) sudo C) who
29. you can read the help manual of any command in linux using the command ____
☒ A) man B) sudo C) cd
30. which of the following linux permissions allows file owner to read it, but no one else can read that file.
☒ A) rwx - - x - -x B) -wx r - x r -x C) wx - - x r -x
31. the ____ camera shot makes your subject appear small against their location (environment)
☒ A) extreme long B) Medium C) Close-Up
32. in Natron, the ____ node allows you to replace green screen background with transparent area.
☒ A) Write B) Viewer C) ChromaKeyer

Question 2- Essay [7 Marks]:

What is the meaning of Directional light

Directional Light is a type of light that emits parallel rays in one direction, similar to sunlight.

Question 3- Essay [7 Marks]:

List 2 types of Animation Principles

Straight-ahead Animation
 Pose-to-pose Animation

Question 4- Essay [6 Marks]: (تتم الإجابة مع Q3)

How many Vertices in Quad polygons?

A Quad polygon has 4 vertices.
