

Lecture 2 – 30 MCQs (Dr.'s Style)

1. Web engineering proposes an _____ yet disciplined framework for building WebApps.

- A) Rigid
- B) Agile
- C) Waterfall
- D) Linear

Answer: B

2. Web engineering aims to build _____ Web applications.

- A) Low-cost
- B) Experimental
- C) Industry-quality
- D) Academic

Answer: C

3. One reason agility is required is that business strategies and rules:

- A) Are stable
- B) Change slowly
- C) Change rapidly
- D) Never change

Answer: C

4. Management often demands _____ responsiveness.

- A) Delayed
- B) Near-instantaneous

- C) Periodic
- D) Planned

Answer: B

5. Agile approaches help cope with:

- A) Stability and control
- B) Fluidity and uncertainty
- C) Documentation overload
- D) Hardware limitations

Answer: B

6. Agile Web engineering combines philosophy and:

- A) Documentation standards
- B) Coding rules
- C) Development guidelines
- D) Testing tools

Answer: C

7. Agile philosophy encourages customer satisfaction through:

- A) Detailed documentation
- B) Final delivery only
- C) Early incremental delivery
- D) Long planning phases

Answer: C

8. Agile teams are typically:

- A) Large and distributed
- B) Small and highly motivated
- C) Unstructured
- D) Management-driven

Answer: B

9. An agile process stresses delivery over:

- A) Testing
- B) Deployment
- C) Analysis and design
- D) Communication

Answer: C

10. Agile development requires _____ communication between developers and customers.

- A) Limited
- B) Occasional
- C) Active and continuous
- D) Formal

Answer: C

11. The highest priority of agile processes is to:

- A) Reduce cost
- B) Satisfy the customer
- C) Finish documentation
- D) Freeze requirements

Answer: B

12. Agile processes welcome changing requirements:

- A) Only early in development
- B) Only before design
- C) Even late in development
- D) Never

Answer: C

13. Agile delivery prefers:

- A) Longer timescales
- B) Shorter timescales
- C) Annual releases
- D) Single delivery

Answer: B

14. Businesspeople and developers should work together:

- A) Weekly
- B) Monthly
- C) Daily
- D) Only during planning

Answer: C

15. The most effective method of conveying information is:

- A) Documentation
- B) Email
- C) Face-to-face conversation
- D) Reports

Answer: C

16. The primary measure of progress in agile development is:

- A) Test cases
- B) Working software
- C) Project plans
- D) Documentation

Answer: B

17. Agile processes promote _____ development.

- A) Rapid
- B) Sustainable
- C) Uncontrolled
- D) Experimental

Answer: B

18. Simplicity is defined as:

- A) Writing less code
- B) Avoiding testing
- C) Maximizing the amount of work not done
- D) Skipping design

Answer: C

19. The best architectures and designs emerge from:

- A) Project managers
- B) Senior developers
- C) Self-organizing teams
- D) Customers

Answer: C

20. A WebE framework is a set of activities performed:

- A) Once
- B) Occasionally
- C) For every Web engineering project
- D) Only in agile projects

Answer: C

21. Framework activities are composed of:

- A) Only tasks
- B) A set of actions
- C) Tools only
- D) Documents

Answer: B

22. Actions encompass all EXCEPT:

- A) Work tasks
- B) Work products
- C) Quality assurance points
- D) Programming languages

Answer: D

23. Umbrella activities are applicable:

- A) At the end of the process
- B) Only during planning
- C) Across the entire WebE process
- D) During construction only

Answer: C

24. The WebE activity that involves heavy customer interaction is:

- A) Planning
- B) Modeling
- C) Communication
- D) Deployment

Answer: C

25. Establishing an incremental plan is the goal of:

- A) Modeling
- B) Construction

- C) Planning
- D) Deployment

Answer: C

26. Code generation and testing are part of:

- A) Communication
- B) Modeling
- C) Construction
- D) Planning

Answer: C

27. Delivering a WebApp increment and collecting feedback occurs during:

- A) Modeling
- B) Deployment
- C) Construction
- D) Planning

Answer: B

28. Software engineering is described as a _____ technology.

- A) Linear
- B) Layered
- C) Random
- D) Iterative only

Answer: B

29. The layer that acts as the “glue” holding all others together is:

- A) Tools
- B) Methods
- C) Process
- D) Quality

Answer: C

30. Testing methods in WebE include all EXCEPT:

- A) Navigation testing
- B) Usability testing
- C) Security testing
- D) Market testing

Answer: D

Exam Tip (Very Important)

If Dr. asks:

- **“stresses delivery over analysis”** → Agile
- **“heavy interaction with customer”** → Communication
- **“primary measure of progress”** → Working software
- **“performed for every project”** → Framework
