

Lecture 3 – 30 MCQs (Dr.'s Style)

1. The WebE process must be agile and adaptable, but it must also be:

- A) Linear
- B) Predictive
- C) Incremental
- D) Sequential

Answer: C

2. The WebE process must be adaptable because it must be adapted to:

- A) Technology only
- B) The problem, project, and people
- C) Management style
- D) Programming languages

Answer: B

3. One reason the WebE process is incremental is that:

- A) Budgets are fixed
- B) Requirements evolve over time
- C) Teams are large
- D) Documentation is heavy

Answer: B

4. Changes in WebApp requirements occur:

- A) Rarely
- B) Only at the beginning
- C) Frequently and at inconvenient times
- D) Only after deployment

Answer: C

5. Incremental delivery allows you to:

- A) Avoid testing
- B) Manage change
- C) Eliminate planning
- D) Fix requirements

Answer: B

6. For each increment, the development cycle is:

- A) Skipped
- B) Shortened
- C) Repeated
- D) Frozen

Answer: C

7. Each WebApp increment starts with which activity?

- A) Construction
- B) Deployment
- C) Communication
- D) Modeling

Answer: C

8. Communication in WebE is characterized by how many actions?

- A) Two
- B) Three
- C) Four
- D) Five

Answer: B

9. Which WebE action defines the business and organizational context?

- A) Negotiation
- B) Elicitation
- C) Formulation
- D) Planning

Answer: C

10. Requirements gathering is primarily part of:

- A) Formulation
- B) Negotiation
- C) Elicitation
- D) Planning

Answer: C

11. Reconciling differences among stakeholders is done during:

- A) Planning
- B) Modeling
- C) Negotiation
- D) Construction

Answer: C

12. Planning identifies the overall number of:

- A) Developers
- B) Tasks
- C) WebApp increments
- D) Stakeholders

Answer: C

13. Tasks in planning are usually scheduled in:

- A) Days
- B) Months
- C) Weeks
- D) Years

Answer: C

14. Project tracking and monitoring commence during:

- A) Communication
- B) Planning
- C) Modeling
- D) Deployment

Answer: B

15. Agile analysis and design models are developed during:

- A) Communication
- B) Modeling
- C) Construction
- D) Deployment

Answer: B

16. Coding and rapid testing are performed during:

- A) Planning
- B) Modeling
- C) Construction
- D) Deployment

Answer: C

17. Delivering the WebApp to end users occurs in:

- A) Construction
- B) Modeling
- C) Deployment
- D) Planning

Answer: C

18. Evaluation feedback is presented to:

- A) Customers only
- B) Stakeholders only
- C) The WebE team
- D) Management

Answer: C

19. During the first iteration, one main goal is to:

- A) Write code
- B) Deploy the system
- C) Define business context
- D) Perform testing

Answer: C

20. The first increment in the example is a(n):

- A) Transaction-oriented WebApp
- B) Service-oriented WebApp
- C) Informational WebApp
- D) Download WebApp

Answer: C

21. The first increment must be delivered in:

- A) One day
- B) One week

- C) One month
- D) Two weeks

Answer: B

22. The “home page” in the example is primarily used as:

- A) A database interface
- B) A transaction engine
- C) Navigation starting point
- D) Security layer

Answer: C

23. FTP of files to a domain occurs during:

- A) Modeling
- B) Planning
- C) Construction
- D) Deployment

Answer: D

24. In the third iteration, the process flow is:

- A) Changed completely
- B) Skipped
- C) Restarted at the beginning
- D) Terminated

Answer: C

25. Tasks selected for one increment may:

- A) Always be the same
- B) Never change
- C) Differ from previous increments
- D) Be eliminated

Answer: C

26. Umbrella activities occur:

- A) After deployment
- B) Before planning
- C) In parallel with main activities
- D) Only at the end

Answer: C

27. How many umbrella activities are crucial for Web engineering?

- A) Two
- B) Three
- C) Four
- D) Five

Answer: C

28. Managing the effects of change is the responsibility of:

- A) Risk management
- B) Quality assurance
- C) Change management
- D) Project management

Answer: C

29. Tracking and monitoring progress is part of:

- A) Risk management
- B) Project management
- C) Quality assurance
- D) Communication

Answer: B

30. Considering project and technical risks is the role of:

- A) Quality assurance
- B) Change management
- C) Risk management
- D) Planning

Answer: C

Dr. Prediction (Very Important)

Expect **at least 6–8 questions** in the exam from:

- Communication actions (Formulation / Elicitation / Negotiation)
- Incremental delivery
- Umbrella activities
- Planning details (weeks, tracking, risks)
