

SYSTEM ANALYSIS

**2023 Final Exam
(Solved)**

Choose the correct answer:

- 1) is a traditional method for system development that is still widely used.
A) Structured analysis
B) O-O analysis
C) Agile Analysis
D) Both 1 and 2
- 2) provide direction, necessary resources, and performance feedback to supervisors and team leaders.
A) Top Managers
B) Operational
C) Middle Managers
D) Users
- 3) The project management phase that project manager can **extract and evaluate reports** to management, users, and the project team itself.
A) Planning
B) Scheduling
C) Monitoring
D) Reporting
- 4) Sets of inter-related procedures using IT infrastructure in a business enterprise to generate and disseminate desired information.
A) BIS
B) MIS
C) KMS
D) CMS
- 5) What are the right words you can use at the **analysis phase**?
A) Implementation and testing.
B) Understanding and specifying.
C) Prototyping and wireframing.
D) Securing and maintaining.
- 6) SWOT analysis is an abbreviation for
A) Study, Weakness, Opportunity, Threat
B) Strength, Weakness, Opportunity, Threat
C) Strength, Weakness, Object, Treat
D) Strength, Weakness, Object, Threat

- 7) Structured walk-throughs take place throughout the SDLC and is called in **maintenance** phase.
- A) Code review
 - B) Test review**
 - C) Design review
 - D) Planning phase
- 8) Structured walk-throughs take place throughout the SDLC and is called in **implementation** phase.
- A) Code review**
 - B) Test review
 - C) Design review
 - D) Planning phase
- 9) Structured walk-throughs take place throughout the SDLC and is called in **Design** phase.
- A) Code review
 - B) Test review
 - C) Design review**
 - D) Planning phase
- 10) Programmers will use it to transform the logical design into program modules and code.
- A) UML
 - B) Use case diagram
 - C) Application architecture**
 - D) Sequence diagram
- 11) The deliverable for the system **design** phase is the
- A) System requirements document
 - B) System Design Specification**
 - C) Functioning system
 - D) Fully operational system
- 12) The deliverable for the system **analysis** phase is the
- A) System requirements document**
 - B) System Design Specification
 - C) Functioning system
 - D) Fully operational system
- 13) is a **traditional** systems development technique that is time-tested and easy to understand.
- A) Structured analysis**
 - B) OOA
 - C) Agile Analysis
 - D) RAD

- 14) Imagine building a house what is the phase of SDLC an considering not a step of creating a house, but it's necessary for the health and to keep the project in a strategic fit.
- A) Analysis
 - B) Planning
 - C) Support and Security**
 - D) Design
- 15) An is a recognizable reference point that can be used to monitor progress.
- A) Task
 - B) Milestone**
 - C) Activity
 - D) User story
- 16) A is any work that has a beginning and an end and requires the use of company resources such as people, time, or money.
- A) Task**
 - B) Milestone
 - C) Activity
 - D) User story
- 17) In activity diagram, black bar with several flows entering it and one leaving it is.
- A) Fork
 - B) Join**
 - C) Basis
 - D) Image
- 18) In activity diagram a black bar (horizontal/vertical) with one flow going into it and several leaving it is.
- A) Fork**
 - B) Join
 - C) Merge
 - D) Avatar
- 19) In use case indicates the scope of your system. Anything within the box represents functionality that is in scope.
- A) Actor
 - B) Activity or action
 - C) System boundary**
 - D) Avatar

- 20) Describe the **static** relationships between components.
- A) Behavioral diagrams
 - B) Structural diagram**
 - C) Static diagram
 - D) Dynamic diagram
- 21) Defined as 'a standard language for specifying, constructing, visualizing, and documenting the software system'.
- A) Unified Method Language
 - B) Unified Modeling Language**
 - C) Unified Member Language
 - D) SWOT Analysis
- 22) Is the process of identifying long-term organizational goals, strategies and resources.
- A) System planning**
 - B) System analysis
 - C) System design
 - D) System implementation
- 23) Who plan, develop, and maintain information systems.
- A) System designer
 - B) System analyst**
 - C) Information system
 - D) Both 1 and 2
- 24) Combines information technology, people and data to support business requirements.
- A) Information system**
 - B) System analysis
 - C) System analysis & design
 - D) Both 1 and 2
- 25) **Class** diagram is type of
- A) O-O diagrams
 - B) Behavioral diagrams
 - C) Structural diagrams**
 - D) Static diagram
- 26) **Sequence** diagram is type of
- A) O-O diagrams
 - B) Behavioral diagrams**
 - C) Structural diagrams
 - D) Static diagram

- 27) Is a bottom-up technique because it analysis a large, complex project as a series tasks.
- A) WBS
 - B) Pert/CPM**
 - C) Gantt chart
 - D) Fishbone
- 28) Is a horizontal bar figure that represents a set of tasks.
- A) WBS
 - B) Pert/CPM
 - C) Gantt chart**
 - D) Fishbone
- 29) Involves breaking a project down into a series of smaller tasks.
- A) WBS**
 - B) Pert/CPM
 - C) Gantt chart
 - D) Fishbone
- 30) include users who rely on transaction processing systems to enter and receive data they need to perform their jobs.
- A) Top Managers
 - B) Operational**
 - C) Middle Managers
 - D) Knowledge Workers
- 31) develop long-range plans, called strategic plans, which define the company's overall mission and goals.
- A) Top Managers**
 - B) Operational
 - C) Middle Managers
 - D) Knowledge Workers
- 32) Top Managers develop long-range plans, called, which define the company's overall mission and goals.
- A) Current plan
 - B) Business Model Canvas
 - C) Strategic plan**
 - D) Routine plan

33) The project management phase that project manager can create of a specific timetable and use Gantt charts and PERT/CPM charts

- A) Planning
- B) Scheduling**
- C) Monitoring
- D) Reporting

34) The project management phase that project manager can identify all project tasks and estimate the completion time and cost of each.

- A) Planning**
- B) Scheduling
- C) Monitoring
- D) Reporting

35) If you need it good and cheap, you would make it

- A) Not fast**
- B) Fast
- C) Scaled
- D) Not scaled

36) If you need it good and fast, you would make it

- A) scaled
- B) cheap
- C) expensive**
- D) Not scaled

37) If you need it cheap and fast, you would make it

- A) Not good**
- B) good
- C) Scaled
- D) Not scaled

38) Project management for IT professionals includes all of the above except

- A) Planning
- B) Scheduling
- C) Monitoring
- D) Merging code**

- 39) A is someone who is responsible for overseeing all relevant tasks.
- A) Tester
 - B) Project Manager**
 - C) Analyst
 - D) Developer
- 40) Consists of everything in the **physical layer** of the information system.
- A) Hardware**
 - B) Software
 - C) People
 - D) Procedures
- 41) It is a **problem-solving technique** that improves the system and ensures that all the components of the system work efficiently to accomplish their purpose.
- A) Implementation
 - B) Design
 - C) Analysis**
 - D) Planning

True/False:

- 1) An agile approach requires intense interactivity between developers and individual users, and does not begin with an overall objective. **(T)**
- 2) In waterfall model when we end a phase we cannot go back and edit it again. **(T)**
- 3) An approach of system development that works well for one project might have major disadvantages or risked in another project. **(T)**
- 4) **Ulm** diagrams have only two types those types is structural diagrams and behavioral diagrams. **(F)**
- 5) RAD systems can be developed more quickly with significant cost savings. **(T)**
- 6) JAD is more expensive and can be cumbersome if the group is too large relative to the size of the project. **(T)**
- 7) Preliminary investigation is an important fact-finding tool during the systems **analysis** phase. Is a planned meeting during which the analyst obtains information from another person. **(F)**
- 8) Fact-finding means collecting information using interviews or other techniques. **(T)**
- 9) JAD can result in a more accurate statement of system requirements, a better understanding of common goals, an a stronger commitment to the success of the new system. **(T)**
- 10) DFDs use four basic symbols that represent processes, data flows, data stores, and entities. **(T)**
- 11) When you design the DFD use unique names within each set of symbols. **(T)**
- 12) Leveling is the process of drawing a series of increasingly details diagrams, until all functional primitives are identified. **(T)**
- 13) A DFD shows only external entity that provide data to the system or receive output from the system. **(T)**
- 14) A logical model shows what the system must do, regardless of how it will be implemented physically. **(T)**

- 15) Questionnaire also called a survey, is a document containing a number of standard questions that can be sent to many individuals. (T)
- 16) Range of responses questions is to ask the person for evaluating something by providing limited answers to specific responses or on a numeric scale. (T)
- 17) The interviewer must avoid the leading questions that suggest or favor a particular reply. (T)
- 18) TOGAF is created by the Open Group, helps businesses align IT goals with overall business goals, while helping to organize cross-departmental IT efforts. (T)
- 19) Zachman framework is a matrix and a popular approach to modeling enterprise architectures. (T)
