

Model 1

1. Which keyword makes a variable immutable in Java?
 - a) const
 - b) final
 - c) static
 - d) immutable
2. Validation ensures...
 - a) Code compiles
 - b) Software meets requirements
 - c) No bugs exist
 - d) Faster execution
3. Unit testing focuses on...
 - a) Whole system
 - b) Individual components
 - c) UI only
 - d) Performance
4. Which annotation runs before each test in JUnit 5?
 - a) @BeforeAll
 - b) @BeforeEach
 - c) @AfterEach
 - d) @Test
5. Which collection allows duplicate elements?
 - a) Set
 - b) Map
 - c) List
 - d) HashSet

6. Black-box testing is based on...

- a) Implementation
- b) Specification
- c) Random inputs
- d) Code review

7. Which tool is used for Java unit testing?

- a) JUnit
- b) NUnit
- c) PHPUnit
- d) EMMA

8. Which annotation disables a test?

- a) @Disable
- b) @Tag
- c) @Nested
- d) @TestFactory

9. Which operator is used for logical AND in Java?

- a) &
- b) &&
- c) ||
- d) !

10. Boundary Value Analysis tests...

- a) Middle values
- b) Extreme values
- c) Random values
- d) Positive values only

Model 2

1. Which keyword defines a class in Java?
 - a) object
 - b) class
 - c) define
 - d) struct
2. Verification checks...
 - a) Execution results
 - b) Requirements only
 - c) Design & documents
 - d) Performance
3. Which tool provides code coverage metrics?
 - a) JMockit
 - b) JUnit
 - c) NUnit
 - d) PHPUnit
4. JUnit 5 requires which Java version?
 - a) Java 6
 - b) Java 7
 - c) Java 8
 - d) Java 9
5. Which collection stores key-value pairs?
 - a) List
 - b) Set
 - c) Map
 - d) Array

6. Equivalence Partitioning divides...
 - a) Code
 - b) Inputs
 - c) Outputs
 - d) Errors
7. Unit testing is done during...
 - a) Deployment
 - b) Coding phase
 - c) Maintenance
 - d) Design phase
8. Which annotation provides custom names in JUnit 5?
 - a) @DisplayName
 - b) @Tag
 - c) @Nested
 - d) @Test
9. Which loop is best when iteration count is known?
 - a) while
 - b) do-while
 - c) for
 - d) switch
10. Decision Table Testing is based on...
 - a) Business rules
 - b) Random inputs
 - c) Code paths
 - d) User feedback
