

MODEL -1 النموذج الأول

16. Consider the following NUnit assertion, Which value of the (Balance) variable makes this assertion success (passed)?

```
Assert.AreEqual( 150 , Balance);
```

- a) 300 b) 250 c) 150

Question 2- Choose the Correct Answer [28 Marks]- [Each 2 Marks]

- Which of the following Symbols should be prevented **يمنع** in user's input to avoid SQL injection attacks?
a) arabic letter b) numbers (0-9) c) single quotation (')
- A _____ is a small piece of data from a web site that is stored on a visitor's browser to help the website track the visitor's activity
a) cookie b) unit test c) thread
- A web session ID is unique to a specific _____ (not repeated)
a) visit b) visitor c) website
- _____ is one of the Server-side session management methods.
a) Hidden form fields b) Browser storage c) HTTP headers
- To prevent XSS attacks, the _____ symbol is a safe way to represent the dangerous character (>) in a web page
a) ' b) > c) <
- Suppose a user managed to complete 3 tasks successfully after make 30 trials /attempts **محاولات** to do them. Then the Usability success score value is _____
a) 10% b) 3 % c) 77%
- Which of the following is the best error rate for a website number of errors usability measure?
a) 100% b) 50% c) 1%
- The URL _____ has the same origin policy like the URL (http://mns.com/say)
a) ftp://mns.com/say b) http://mns.com:90/say c) http://mns.com/main
- Which Utilization type is the most difficult to calculate?
a) Time-Based b) Capacity-Based c) both are the same
- The purpose of the Stress Testing is to find the _____ load the web server can handle
a) Maximum b) Minimum c) unit
- In JMeter, A single _____ represent a single user.
a) Line of Code b) thread c) memory-leak
- In Mobile _____ cross development , the programmer uses Use standard web technologies such as HTML 5, CSS 3 & JavaScript which runs in standalone mobile web browser.
a) Native b) Cross-Compilation c) WEB APPS
- Which mobile testing platform is easier for debugging code step-by step?
a) Real device b) Emulator device c) HP-Load runner
- _____ is a popular open-source framework used for automated mobile app testing.
a) HP-Load runner b) Appium c) System Usability Scale (SUS)

Question 1- Choose the Correct Choice [32 Marks]- [Each 2 Marks]

1. Which of the following CMM maturity levels is the worst **الأسوأ**?
a) **Initial** b) Defined c) Optimizing
2. _____ CMM focuses on **CONTINUOUSLY IMPROVING PROCESS performance**.
a) Initial b) Defined c) **Optimizing**
3. The _____ is A flaw/problem in software that is uncovered **after delivery** to the end-user.
a) CMMI b) **Defect** c) black-box
4. Which of the following software measures is **NOT Size-Oriented Metrics**?
a) Lines of Code (LOC) b) Cost per KLOC c) **Number of key classes**
5. A _____ error is a bug that occurs when a program has an **incorrect statement**. It is the equivalent of a **typo** or **spelling** error in word processing.
a) Logic b) **syntax** c) runtime
6. _____ is The process of **locating** and **fixing** bugs (errors) in program code
a) LOC b) performance tuning c) **debugging**
7. _____ is the process of **removing** all **unnecessary characters** from JavaScript source code **without** altering its functionality.
a) **Minification** b) breakpoint c) referencing
8. In _____ data types, it's possible that **two or more** references can point to the same object.
a) **reference** b) value c) jmeter
9. _____ is testing that **ignores** the internal **code** of a system and focuses solely on the **outputs** generated in response to selected inputs and execution conditions in runtime.
a) white-box b) **black-box** c) green-box
10. _____ Testing checks that an **individual** program unit (method, function or class) behaves **correctly**.
a) **Unit** b) A/B testing c) Dream
11. In **Top Down** Testing, All called units are replaced by _____.
a) **stubs** b) trees c) integration
12. Suppose that valid range for the month is 1 to 12, standing for January to December. The value of _____ is a **boundary** for **partition** analysis.
a) 10 b) **11** c) 12
13. Suppose a program is designed to input **birth dates**, which of the following is a **negative** testing test case for that input?
a) 1/1/2024 b) **"Happy Birthday"** c) 8/2/1974
14. Assume a program has a **total 100** lines of code statements. A tester has tested **70** lines of that program. Then the **statement coverage** is _____.
a) 30 b) **70** c) 100
15. The _____ testing is Conducted at the **developer's Environment** by **end users**.
a) **Alpha** b) Beta c) Acceptance
