

The following is a type of existing components that are the basis of building many present-day software systems that to be reused in many systems.

الإجابة

☒ All of the mentioned correct

- ☐ off-the-shelf (COTS) components
- ☐ custom-built (in-house) components
- ☐ Open source software components.

_____ are Large-scale systems that encapsulate generic business functionality and rules are configured for an organization.

الإجابة

- ☐ application Framework
- ☐ Product lines
- ☐ Systems of systems
- ☒ ERP systems

_____ is one of Lehman's laws that indicates that the system will be perceived as losing quality over time, unless its design is carefully maintained and adapted to new operational constraints.

الإجابة

- ☐ Continuing change
- ☐ Continuing growth
- ☒ Declining quality
- ☐ Increasing complexity

_____ is one of Lehman's laws that indicates that system will become progressively less satisfying to its user over time, unless it is continually adapted to meet new needs.

الإجابة

- ☐ Increasing complexity
- ☐ Continuing growth
- ☒ Continuing change
- ☐ Self-regulation

03:57

_____ provides support for component inter- inter-
operability and component communication.
الإجابة

- ☐ design
- ☐ interfacee
- ☐ documentation
- ☒ middleware

التالي

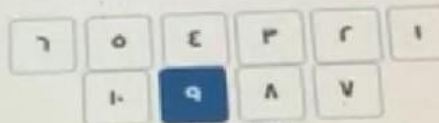

03:54

_____ is the process of making a change to the
internal structure of software to make it easier to
understand and cheaper to modify without changing its
observable behavior
الإجابة

- ☐ Forward engineering
- ☒ Refactoring
- ☐ Software Configuration Management
- ☐ maintenance

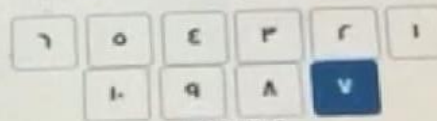

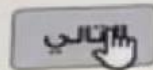

التالي

03:53

_____ is the activity of defining a more abstract, and easier to understand, representation of the system
الإجابة

- ☐ maintenance
- ☐ Software Configuration Management
- ☐ Reengineering
- ☒ Reverse engineering

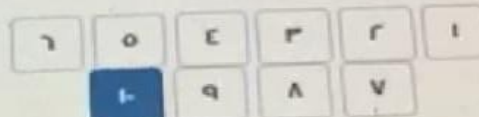

03:56

_____ is the task of estimating the parts of the software that can be affected if a proposed change request is made.

الإجابة

- ☐ Testing
- ☐ maintenance
- ☒ Impact analysis
- ☐ Prototyping
